

Planning and Quality Assurance Affairs

Form (A)

Course Specifications

General Information

Course name	Oral Pathology
Course number	DENT3204
Faculty	
Department	
Course type	College Needs
Course level	3
Credit hours (theoretical)	2
Credit hours (practical)	0
Course Prerequisites	

Course Objectives

1 - understand the main classification of oral tumors
2 - understand the features of epithelial tissue tumors
3 - understand the features of connective tissue tumors
4 - differentiate between odontogenic and nonodontogenic tumors in the oral cavity
5 - understand the cysts
6 - have a clear idea about bone disease related to the jaws
7 - be familiar with the developmental disturbances of the teeth and jaws

Intended Learning Outcomes

Knowledge and Understanding	<ul style="list-style-type: none"> * understand the main classification of oral tumors * understand the features of epithelial tissue tumors * understand the features of connective tissue tumors * understand the cysts
Intellectual Skills	<ul style="list-style-type: none"> * differentiate between odontogenic and nonodontogenic tumors in the oral cavity
Professional Skills	<ul style="list-style-type: none"> * be familiar with the developmental disturbances of the teeth and jaws * have a clear idea about bone disease related to the jaws
General Skill	<ul style="list-style-type: none"> * improve the students ability of observation * improve the students ability of linking information

Course Contents

- | |
|--|
| 1 - Epithelial Tissue Tumors |
| 2 - Connective Tissue Tumors |
| 3 - Salivary Gland Tumors |
| 4 - Odontogenic Tumors |
| 5 - Bone Disease |
| 6 - Hormonal Disturbances |
| 7 - Dental Caries , Periapical Lesions |
| 8 - Developmental Disturbances |
| 9 - Cyst (odontogenic – non odontogenic) |

Teaching and Learning Methods

- | |
|-------------------------|
| 1 - power point slides |
| 2 - histological slides |
| 3 - educative videos |

Students Assessment

<u>Assessment Method</u>	<u>TIME</u>	<u>MARKS</u>
midterm exam	7th week	50
final exam	14th week	50

Books and References

Course note	oral pathology	department members

Knowledge and Skills Matrix

Main Course Contents	Study Week	Knowledge and Understanding	Intellectual Skills	Professional Skills	General Skill
Epithelial Tissue Tumors	1st,2nd week	know classification of epithelial tissue tumors know the most common epithelial tissue tumors know the radiographic and histopathological features of different types of epithelial tissue tumors	realize the differences between benign and malignant tumors	be familiar with the epithelial tissue tumors of the oral cavity	improve the students ability of observation
connective tissue tumors	2nd , 3rd week	know classification of connective tissue tumors know the most common connective tissue tumors know the radiographic and histopathological features of different types of connective tissue tumors	realize the differences between benign and malignant tumors	be familiar with the connective tissue tumors of the oral cavity	improve the students ability of linking information
Salivary Gland Tumors	4th week	know classification of Salivary Gland tumors know the most common Salivary Gland tumors know the radiographic and histopathological features of different types of Salivary Gland tumors	realize the differences between benign and malignant Salivary Gland tumors	be familiar with the Salivary Gland tumors	improve the students ability of logical thinking

Odontogenic Tumors	5th , 6th week	know classification of Odontogenic tumors know the most common Odontogenic tumors know the radiographic and histopathological features of different types of Odontogenic tumors	realize the differences between benign and malignant Odontogenic tumors	be familiar with the Salivary Gland tumors	improve the students ability of observation
Bone Disease	8th week	know classification of Bone Disease know the most common Bone Disease know the radiographic and histopathological features of different types of Bone Disease	differentiate between the types of bone disease with its different clinical features	be familiar with the bone disease be familiar with diagnosis of different types of bone disease	improve the students ability of logical thinking
Hormonal Disturbances	9th week	understand the effects of hormones on the whole body know the different hormonal disturbances which affects the oral cavity		be familiar with the hormonal disturbances affects the oral cavity	improve the students ability of linking information
Dental Caries , Periapical Lesions	10th week	understand the different theories describe the formation of dental caries know the different periapical lesions	realize the signs of each periapical lesion realize the acidogenic theory and the role of carbohydrates in the caries formation process	be familiar with the diagnosis of periapical lesions be familiar with diagnosis of dental caries	improve the students ability of observation
Developmental Disturbances	11th week	understand the developmental disturbances	realize the signs and symptoms of the developmental disturbances	improve the students ability in diagnosis of different developmental disturbances	improve the students ability of observation

Cyst (odontogenic – non odontogenic)	12th , 13th week	understand the term of cyst understand the types of cyst	differentiate between odontogenic and non odontogenic cyst realize the signs and symptoms of cysts realize the radiographic and histopathological features of cysts	have the ability to diagnose cysts	improve the students ability of logical thinking
--------------------------------------	------------------	---	---	------------------------------------	--
