

Planning and Quality Assurance Affairs

Form (A)

Course Specifications

General Information

Course name	Oral Surgery I
Course number	DENT4203
Faculty	
Department	
Course type	College Needs
Course level	4
Credit hours (theoretical)	2
Credit hours (practical)	0
Course Prerequisites	

Course Objectives

- 1 - Introduce the student to the basic principles and techniques in oral and maxillofacial surgery
- 2 - Enable the student to have intellectual, clinical and problem solving skills in basic, complicated exodontia and minor oral surgical procedures based on an outpatient population.
- 3 - Allow student to gain clinical experience in undertaking, and recording case history and performing physical examination of patient requiring minor oral surgery.

Intended Learning Outcomes

Knowledge and Understanding	<ul style="list-style-type: none"> * Discuss the indications and contra-indications of tooth extraction * Describe the technique of forceps extraction and use of dental elevators for uncomplicated exodontia. * Identify and list the armamentarium needed for minor oral surgery procedures * Describe the principles of mucoperiosteal flap design and surgical removal of teeth. * Recognize complications resulting from teeth extraction.
Intellectual Skills	<ul style="list-style-type: none"> * Identify Medically compromised patients * Identify tooth for extraction * Identify possible complication
Professional Skills	<ul style="list-style-type: none"> * Should develop skills for identifying and managing medically compromised patients * Should develop skills for administering LA and perform extraction for all the teeth

Course Contents

- 1 - Preoperative health status evaluation
- 2 - Management of medically compromised patients. Pathophysiology, recognition, prevention, and management
- 3 - Management of medically compromised patients. Pathophysiology, recognition, prevention, and management
- 4 - Prevention and management of medical emergencies. Emergency means and measures.
- 5 - Anatomical consideration and exodontia.
- 6 - Introduction, to exodontia, mechanical principles, preoperative assessment, armamentarium sterilization and care of instruments, forceps extraction and complication.
- 7 - Anatomical consideration and exodontia.
- 8 - Anatomical consideration and exodontia.
- 9 - Surgical exodontia and complication of exodontia. Tooth sectioning, elevators principles, suturing, bone removal, care of wound and complication.
- 10 - Surgical exodontia and complication of exodontias
- 11 - Surgical exodontia and complication of exodontias
- 12 - Principles of surgery. Incisions, Flap design, Tissue handling, Aseptic technique
- 13 - Prophylactic and therapeutic use of antibiotic in dentistry.

Teaching and Learning Methods

- 1 - Lectures
- 2 - Power point
- 3 - Discussion
- 4 - Assignments

Students Assessment

<u>Assessment Method</u>	<u>TIME</u>	<u>MARKS</u>
mid- term exam and assignments		40%
final exam		60%
