

## Planning and Quality Assurance Affairs

Form (A)

### Course Specifications

#### General Information

|                                   |                      |
|-----------------------------------|----------------------|
| <b>Course name</b>                | Computer Science (2) |
| <b>Course number</b>              | ITCS1302             |
| <b>Faculty</b>                    |                      |
| <b>Department</b>                 |                      |
| <b>Course type</b>                | College Needs        |
| <b>Course level</b>               | 1                    |
| <b>Credit hours (theoretical)</b> | 3                    |
| <b>Credit hours (practical)</b>   | 0                    |
| <b>Course Prerequisites</b>       |                      |

#### Course Objectives

- 1 - Upon completing this course the student will have learned, through appropriate classroom and laboratory experiences, the following.
- 2 - Basics of Java language, i/o, data types, control, loops, methods
- 3 - Basics of OO programming, classes, attributes, objects, instance.
- 4 - Identifying the implications of inheritance, overloading, polymorphism.
- 5 - Access modifiers, abstraction, abstract classes, interfaces, packages.
- 6 - Designing programs using object-oriented design techniques.
- 7 - Using advanced Java input/output facilities to store data in text files and indexed binary files, Exceptions.
- 8 - Writing programs that use application program interfaces and graphical user interfaces (GUI) to interface with users and other systems.

## Intended Learning Outcomes

|                                    |   |
|------------------------------------|---|
| <b>Knowledge and Understanding</b> | <ul style="list-style-type: none"><li>* On successful completion of the course, students should be able to:</li><li>* a1. Identify basic principles of object-oriented program design.</li><li>* a2. Identify the basic and some advanced issues related to writing classes and methods - such as data, visibility, scope, method parameters and object references</li><li>* a3. Explain the basic ideas behind class hierarchies, polymorphism, and programming to interfaces.</li><li>* a4. Describe the differences between basic I/O streams and graphical user interfaces.</li><li>* a5. Identify and demonstrate usage of tools, practices and methodologies used in the specification, design and implementation.</li><li>* d3. Demonstrate efficient IT capabilities.</li></ul> |
| <b>Intellectual Skills</b>         | <ul style="list-style-type: none"><li>* b1. Define traditional and nontraditional problems, set goals towards solving them, and, observe results.</li><li>* b2. Identify attributes, components, relationships, patterns, main ideas, and errors.</li><li>* b3. Describe different classifications of (data, results, methods, techniques, algorithms, etc.).</li><li>* b4. Identify a range of solutions and critically evaluate and justify proposed design solutions.</li><li>* b5. Apply the concepts, principles, theories and practices underpinning computing as an academic discipline.</li></ul>   |
| <b>Professional Skills</b>         | <ul style="list-style-type: none"><li>* c1. Solve a given application problem by going through the basic steps of program specifications, analysis, design, implementation within the context of the object-oriented paradigm.</li><li>* c2. Demonstrate solid Java programming skills and ability to put in practice the acquired knowledge and understanding of the Java language and object-oriented design in relatively simple case studies.</li><li>* c3. Develop Java implementations of abstract data types using different approaches, and evaluate their differences.</li><li>* c4. Apply tools and techniques for the design and development of applications.</li></ul>  |
| <b>General Skill</b>               | <ul style="list-style-type: none"><li>* d1. Communicate effectively by oral, written and visual means.</li><li>* d2. Work effectively as an individual and as a member of a team.</li><li>* d4. Lead and motivate individuals.</li><li>* d5. Manage tasks and resources.</li><li>* d6. Work in stressful environment and within constraints.</li></ul>  |

## Course Contents

|  |
|--|
| <ol style="list-style-type: none"><li>1 - Basics of the OO language of interest such as Java that include program structure, data types, I/O, control, loops, methods, methods overloading and overriding. Matrices, strings.</li><li>2 - Object oriented paradigms , classes, objects, instances, inheritance, abstraction, interfaces, polymorphism, data hiding, visibility scopes, packages.</li><li>3 - File i/o and streams, graphical user interface (GUI) designs packages and tools, events and event handling, java applets.</li></ol> |
|--|

## Teaching and Learning Methods

|  |
|--|
| <ol style="list-style-type: none"><li>1 - Lectures</li><li>2 - Tutorial Exercises</li><li>3 - Practical Exercises</li><li>4 - Projects</li></ol> |
|--|

## Students Assessment

| <u>Assessment Method</u> | <u>TIME</u> | <u>MARKS</u> |
|--------------------------|-------------|--------------|
| Final Exam               | Week 16     | 50%          |
| Practical Exercises      |             | 15%          |
| Mid-Term Exam            | Week 8      | 20%          |
| Projects                 |             | 15%          |

## Books and References

|                   |  |
|-------------------|--|
| Course note       | Short course notes available at doctor's office.   |
| Essential books   | Y.Daniel, Liang , Introduction to Java Programming, 7thed, 2008.   |
| Recommended books | C. Thomas Wu, An introduction to OO programming with Java, Second Edition 2001.<br>H. M. Deitel and P.J. deitel, Java How to Program, Fourth Edition 2002. |

## Knowledge and Skills Matrix

| Main Course Contents   | Study Week | Knowledge and Understanding | Intellectual Skills | Professional Skills | General Skill |
|--|------------|-----------------------------|---------------------|---------------------|---------------|
| Basics of the OO language of interest such as Java that include program structure, data types, I/O, control, loops, methods, methods overloading and overriding. Matrices, strings | 1-4        | a1                          | b1, b3, b4, b5      | c1                  | d1-d6         |
| Object oriented paradigms , classes, objects, instances, inheritance, abstraction, interfaces, polymorphism, data hiding, visibility scopes, packages                              | 5-9        | a1-a3                       | b2, b4, b5          | c2-c4               | d1-d6         |
| File i/o and streams, graphical user interface (GUI) designs packages and tools, events and event handling, java applets   | 9-14       | a4, a5                      | b5, c2              | c4                  | d1-d6         |
