Course Objectives

1 - To break the ice between the students and the language
2 - To achieve fluency and accuracy in the spoken skills
3 - To wipe off the hesitation during speaking

Course Contents

1 - The course is meant to accustom, the students who select English specialization as main course for their diploma teaching. The teacher, here, has to raise an issue that needs a solution. This will be through practical conversation either among the students themselves or between the student and the lecturer or both. This practical field of teaching will erase the fear from the students who will, by the end of the course, be fully aware of the many conversational methods in practical ways. The book given to the students helps them to achieve the aim.
