

## Planning and Quality Assurance Affairs

Form (A)

### Course Specifications

#### General Information

Course name	Graduation Project II
Course number	ITIS4331
Faculty	
Department	
Course type	Major Needs
Course level	4
Credit hours (theoretical)	3
Credit hours (practical)	0
Course Prerequisites	

#### Course Objectives

- 1 - Applying, during a significant period and in a relevant context, the knowledge and academic skills that have been acquired during the program study
- 2 - Enlarging the knowledge domain by specialized study and engage more practical skills
- 3 - Understanding and evaluating risks and issues surrounding information systems projects
- 4 - Basic and more advanced techniques and concepts associated with project management, as how to develop their own
- 5 - Integration of management techniques in a Software Development Life Cycle
- 6 - Understanding the diverse organizational and managerial aspects of software projects
- 7 - Create management plans for technology projects
- 8 - Complete projects on schedule and within budget while meeting performance and quality objectives

## Intended Learning Outcomes

Knowledge and Understanding	<ul style="list-style-type: none"> <li>* a1. Demonstrate basic knowledge and understanding of a core of analysis, algebra, applied mathematics and statistics</li> <li>* a2. Demonstrate strong knowledge of information systems</li> <li>* a3. Demonstrate strong skills of database management systems</li> <li>* a4. Discuss the principles and techniques of a number of application areas informed by the research directions of the subject, such as data mining, information engineering, and geographical information systems</li> <li>* a5. Explain the broad context within which Computer information Science including issues such as quality, reliability, enterprise, employment law, accounting and health</li> <li>* a6. Discuss the challenges inherent in the maintenance and evolution of software systems, and the techniques and best practices currently available for dealing with them</li> <li>* a7. Provide a deeper understanding of some aspects of the subject, such as Unified Process, object-oriented analysis and design, e-commerce technologies, and Decision support systems</li> <li>* a8. Interpreting and analyzing data qualitatively and/or quantitatively</li> <li>* a9. Identify tools, practices and methodologies used in the specification, design, implementation and critical evaluation of information and computer systems</li> <li>* a10. Identify methods used in defining and assessing criteria for measuring the extent to which an information system is appropriate for its current deployment and future evolution</li> <li>* a11. Outline research fields across a range of knowledge areas</li> </ul>
Intellectual Skills	<ul style="list-style-type: none"> <li>* b1. Define traditional and nontraditional information systems problems, set goals towards solving them, and. observe results</li> <li>* b2. Perform comparisons between (methods, techniques...etc)</li> <li>* b3. Identify attributes, components, relationships, patterns, main ideas, and errors</li> <li>* b4. Summarize the proposed solutions ad their results</li> <li>* b5. Restrict solution methodologies upon their results</li> <li>* b6. Establish criteria, and verify solutions</li> <li>* b7. Identify a range of solutions and critically evaluate and justify proposed design solutions</li> <li>* b8. Solve Information Systems problems with pressing commercial or industrial constraints</li> <li>* b9. Generate an innovative design to solve a problem containing a range of commercial and industrial constraints</li> <li>* b10. Perform problem analysis from written descriptions; derive requirements specifications from an understanding of problems (analysis, synthesis)</li> <li>* b11. Create and/or justify designs to satisfy given requirements (synthesis, evaluation, application)</li> </ul>
Professional Skills	<ul style="list-style-type: none"> <li>* c1. Use appropriate programming languages, web-based systems and tools, design methodologies, and database systems</li> <li>* c2. Apply the principles of effective information management, information organization, and information-retrieval skills to information of various kinds, including text, images, sound, and video</li> <li>* c3. Apply the principles of human-computer interaction to the evaluation and construction of a wide range of materials including user interfaces, web pages, and multimedia systems</li> <li>* c4. Identify any risks or safety aspects that may be involved in the operation of computing equipment within a given context</li> </ul>

<b>Professional Skills</b>	<ul style="list-style-type: none"> <li>* c5. Deploy effectively the tools used for the construction and documentation of software, with particular emphasis on understanding the whole process involved in using computers to solve practical problems</li> <li>* c6. Commercialize knowledge and skills to computing community and industry</li> </ul>
<b>General Skill</b>	<ul style="list-style-type: none"> <li>* d5. Lead and motivate individuals</li> <li>* d1. Collaborate effectively within multidisciplinary team</li> <li>* d2. Work in stressful environment and within constraints</li> <li>* d3. Communicate effectively</li> <li>* d4. Demonstrate efficient IT capabilities</li> <li>* d6. Manage tasks and resources</li> <li>* d7. Search for information and adopt life-long self-learning</li> <li>* d8. Acquire entrepreneurial skills</li> <li>* d9. Develop a range of fundamental research skills, through the use of online resources, technical repositories and library-based material</li> </ul>

## Course Contents

1 - Introduction
2 - System design
3 - System implementation
4 - Product
5 - Testing
6 - Documentation
7 - Presentation and Discussion

## Teaching and Learning Methods

1 - Graduation Project Guides
-------------------------------

## Students Assessment

<u>Assessment Method</u>	<u>TIME</u>	<u>MARKS</u>
Supervisor(s)	During the 16 weeks	50
Discussion Committee(2 Members)	16th week	50

## Books and References

Essential books	Suggested by the advisor of each group
	Suggested by the advisor of each group

## Knowledge and Skills Matrix

Main Course Contents	Study Week	Knowledge and Understanding	Intellectual Skills	Professional Skills	General Skill
Introduction	1	a1-a8, a11	b1-b11	c1-c5	d1-d9
System design	2-3	a1-a9	b1-b11	c1-c5	d1-d8
System implementation	4-10	a1-a9	b1-b11	c1-c5	d1-d8
Product	11-12	a1-a8	b1-b11	c1-c6	d1-d8
Testing	13	a1-a10	b1-b11	c1-c5	d1-d8
Documentation	14-15	a11			d1-d9
Presentation and Discussion	16				d1-d9
